

IN GREAT DISTRESS

VOMITING SPELLS LONG RESISTED EVERY EFFORT TO CHECK.

Mrs. Brooks Became So Weak She Thinks She Would Have Died But For Dr. Williams' Pink Pills.

Mrs. Sarah L. Brooks, of No. 45 Lincoln Park, Chicago, Illinois, gives the following account of her cure from distressing spells of vomiting:

"For five years off and on I was treated in vain by different doctors for relief from a stomach trouble which showed itself in frequent and trying spells of vomiting. Part of the time I was able to work, and again I would be confined to bed for three or four days in succession.

"My stomach was at times so delicate that it would not retain even plain water. The spells would sometimes occur at intervals of half an hour, and would leave me so weak that I would be compelled to lie down between them. I would have several of them during the night following a day of such attacks. Finally I became so weakened that I had to give up working altogether. I weighed only ninety-four pounds.

"Last January I read about Dr. Williams' Pink Pills for Pale People in one of the Chicago daily papers and bought a box and began to use them. After I had used half a box I found that I could keep on my stomach the food I ate. I was encouraged by this and kept on using the pills for four months. At the end of that time the vomiting spells had ceased altogether and my weight went up to 142 pounds and is still growing.

"I think I surely would have died if it had not been for Dr. Williams' Pink Pills, for I sometimes vomited clear blood, and for three or four days at a time I could not eat a bite of anything. One doctor said I had chronic inflammation of the stomach, and another said my difficulty was a cancer, but none of their medicines did me any good at all. Finally I concluded that I did not have blood enough to digest my food, and I began the treatment that has cured me. I can eat anything now, and have strength for all kinds of work. I always keep Dr. Williams' Pink Pills on hand, and I recommend them to my friends because I know they cured me."

Dr. Williams' Pink Pills agree with the most delicate stomachs and strengthen the digestive organs until they do their work perfectly. They are sold by all druggists.

Could Not Be Effected.

A good story is told of A. C. MacLaren, a well-known cricket player. He was playing a picnic match "up country" in Australia when one of the batsmen skied a ball very high between the wickets. MacLaren was waiting for the catch, but the striker in running past cried, "Oh, Archie, drop it, do, and I'll allow you to kiss my sister." MacLaren, it is added, was proof against the attempted bribery.

Try One Package.

If "Defiance Starch" does not please you, return it to your dealer. If it does, you get one-third more for the same money. It will give you satisfaction, and will not stick to the iron.

Comprehensive.

"If I wrote on till I told you everything, Mavourneen"—so ran the closing paragraph in a certain impassioned young Irishman's love letter—"I still be having a volume to tell you, darling."—New Orleans Picayune.

Governor Bob Taylor of Tennessee has come in possession of a lion. In eulogizing the animal he says: "Sometimes I think it is a dream. I sometimes feel like the girl who said she often had strange feelings. Sometimes she thought it was religion and sometimes she thought it was worms."

When faith is lost and honor dies, the man is dead.—Whittier.

SCIENCE and INVENTION

Convenient Trunk.

Everybody has helped to pack a trunk at some time or other, and the most inconvenient and troublesome part of it all is the insertion of the tray, which most all trunks contain, into its proper position. It is practically impossible for one person to do this alone without vexation and hard work, and often two have trouble enough.

If all trunks were constructed like the one shown herewith all this inconvenience would be done away with and the packing simplified. The tray is supported by four bars or levers, two on each side, so arranged that when the lid of the trunk is opened the tray is elevated simultaneously with the raising of the lid. By the insertion of a number of lugs to connect with the levers the tray, when once elevated, is held firmly in that

Raises the Tray Automatically.

position and cannot slip, but must be released by the hand. When the lid is closed the bars still hold the tray in position and no stationary support is necessary within the body of the trunk. Often, when it is thought that the trunk is packed, it is suddenly remembered that some needful article has been forgotten, and what a job to haul the tray out in order to put it in some corner! This will occur a half-dozen times, which means a whole lot of trouble. With this device the opening and closing of the lid, with the consequent raising of the tray, can be done easily and quickly.

Peter Steiger of Baltimore, Md., is the patentee.

Valuable Scientific Tests.

The public which gathers around this testing plant to see a locomotive which, while it is standing still, is doing its carefully measured work of hauling a large or small train at a low or high speed, as the investigators require, thinks that this is all being done that it may "see the wheels go 'round.'" The engineer and the railway man see in it a new era of technical study. Over the panting, tugging locomotive twenty-five or more men are engaged in observing what is going on inside of it, what work it is doing for the fuel consumed, what weaknesses it is developing and what good points. When their computations are completed they can say with accuracy what the locomotive can do and at what cost. They are gaining information which, expressed in technical terms, is invaluable for the locomotive designer of the future. It means in its ultimate results the obtaining of the greatest amount of work for the least expenditure, and a consequent reduction in the cost of transportation. This kind of scientific investigation is of the utmost economic value. The greatest technical societies are assisting through advisory committees, and the results of the tests will therefore meet with universal acceptance. Twelve of the most important types of recent locomotives are to be tested during the exposition and the results published to the world.—W. A. Smith in the World To-Day.

Many women are denied the happiness of children through derangement of the generative organs. Mrs. Beyer advises women to use Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM:—I suffered with stomach complaint for years. I got so bad that I could not carry my children but five months, then would have a miscarriage. The last time I became pregnant, my husband got me to take Lydia E. Pinkham's Vegetable Compound. After taking the first bottle I was relieved of the sickness of stomach, and began to feel better in every way. I continued its use and was enabled to carry my baby to maturity. I now have a nice baby girl, and can work better than I ever could before. I am like a new woman."—MRS. FRANK BEYER, 22 S. Second St., Meriden, Conn.

Another case which proves that no other medicine in the world accomplishes the same results as Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM:—I was married for five years and gave birth to two premature children. After that I took Lydia E. Pinkham's Vegetable Compound, and it changed me from a weak, nervous woman to a strong, happy and healthy wife within seven months. Within two years a lovely little girl was born, who is the pride and joy of my household. If every woman who is cured feels as grateful and happy as I do, you must have a host of friends, for every day I bless you for the light, health and happiness Lydia E. Pinkham's Vegetable Compound has brought to my home. Sincerely yours, Mrs. MAM P. WHARRY, Flat 31, The Norman, Milwaukee, Wis."

Actual sterility in woman is very rare. If any woman thinks she is sterile let her write to Mrs. Pinkham at Lynn, Mass., whose advice is given free to all would-be and expectant mothers.
